

## Galvano Pen

### Betzmann Electroplating Pen Electroplating Pen:

The pen for finest and filigree pen electroplating with graphite electrode  
+ 3 x felt tips  
+ 2 x cables + alligator clip

Suitable for plating most metals  
ideally suited for all pen and pad electroplating, small electroplating lines and  
power supplies.

The electroplating pens offer among others jewelers, watchmakers, jewelry manufacturers and also all hobby electroplaters the possibility to easily electroplate jewelry.

The electroplating pens make it possible to carry out fine and very fine decorative electroplating work on jewelry and other small parts. In this way, jewelry can even be partially gold-plated. With the pen electroplating system it is possible to obtain a 2-tone precious metal coating even on very small surfaces. Whether in the studio, in the jewelry industry or at the jeweler's, the electroplating pens with the fine fiber pen attachments enable multifaceted color shades and sophisticated results that will amaze you. Electroplating pens are also ideal for repair and touch-up work.

#### Directions for use:

The plus cable is plugged in at the end of the grip piece, and a replaceable felt in the front.

Please use one felt per electrolyte (they can be used for a very long time).

The felts should be thoroughly soaked and moistened before use, as this is the only way they will pass the current.

The integrated graphite electrode is excellent for gold plating, chrome plating, silver plating, palladium plating, copper plating, zinc plating, black ruthenium, black chrome, black rhodium, nickel plating, rose gold, green gold, white gold and many more.
